

UNIVERSITI UTARA MALAYSIA

COLLEGE OF ARTS AND SCIENCES (SCHOOL OF COMPUTING)

A232 Session

Possible Topic for Business Plan

STID3153: IT Entrepreneur

1.0 These topics cover a range of emerging areas in IT entrepreneurship, such as artificial intelligence (AI), blockchain, Internet of Things (IoT), cybersecurity, virtual reality (VR), and data analytics.

1. AI-Powered Virtual Healthcare Assistant
2. Blockchain-Based Supply Chain Traceability Platform
3. Cybersecurity Training and Consulting Services
4. E-commerce Personalization and Recommendation Engine
5. Augmented Reality (AR) for Remote Collaboration and Training
6. Cloud-Based Data Analytics Platform for Small Businesses
7. Smart Home Automation and Energy Management Solutions
8. Intelligent Chatbot for Customer Support and Engagement
9. IoT-Enabled Fleet Management and Logistics Optimization
10. Virtual Reality (VR) Gaming and Entertainment Platform
11. Robotic Process Automation (RPA) for Streamlining Business Operations
12. Data Privacy and Compliance Management Software
13. EdTech Platform for Personalized Learning and Skill Development
14. Social Media Analytics and Influencer Marketing Platform
15. Mobile Payment and Digital Wallet Solution
16. Predictive Maintenance and Asset Monitoring System
17. Drone Delivery Services for Last-Mile Logistics
18. Virtual Reality (VR) Training and Simulation Solutions for Industries
19. Cloud-Based HR and Talent Management Software
20. AI-Powered Personal Finance and Investment Assistant
21. Machine Learning-Powered Fraud Detection and Prevention System
22. IoT-Enabled Smart Agriculture Solutions
23. Telemedicine and Remote Healthcare Monitoring Platform
24. AI-Powered Language Translation and Localization Services
25. Cybersecurity Solutions for Internet of Things (IoT) Devices
26. SaaS-based Project Management and Collaboration Tool
27. Digital Marketing Analytics and Performance Tracking Platform
28. Data-Driven Customer Relationship Management (CRM) Software
29. E-learning Platform for Professional Development and Certification
30. Cloud-Based Point-of-Sale (POS) System for Retail Businesses

2.0 These topics cover areas such as customer service, marketing, healthcare, retail, cybersecurity, smart cities, and quantum computing

- 31. Robotic Process Automation (RPA) for Customer Service and Support
- 32. AI-Powered Personalized Marketing and Advertising Platform
- 33. Cloud-Based Video Conferencing and Collaboration Tools
- 34. Data-driven Personalized Healthcare and Wellness Solutions
- 35. Virtual Reality (VR) and Augmented Reality (AR) for Retail Experiences
- 36. Blockchain-Based Digital Identity Verification and Authentication
- 37. Intelligent Document Management and Automation System
- 38. AI-Powered Cyber Threat Intelligence and Detection
- 39. Smart City Solutions for Sustainable Urban Development
- 40. Quantum Computing Services and Applications

3.0 These topics delve into areas such as fashion, data privacy, digital rights management, smart homes, cybersecurity, manufacturing, e-commerce, and smart cities. They offer opportunities to explore cutting-edge technologies and their application in various industries

- 41. AI-Powered Personalized Fashion and Style Recommendations
- 42. Cloud-Based Data Privacy and Compliance Management for Enterprises
- 43. Blockchain-Based Digital Rights Management for Creative Industries
- 44. Voice-Activated Virtual Assistants for Smart Homes and Offices
- 45. Cybersecurity Solutions for Internet of Things (IoT) Networks
- 46. AI-Driven Predictive Maintenance for Manufacturing and Industrial Processes
- 47. Cloud-Based Data Warehousing and Business Intelligence Platform
- 48. E-commerce Platform for Sustainable and Ethical Products
- 49. Robotics and Automation Solutions for Warehouse Management
- 50. IoT-Based Smart City Parking and Traffic Management System

4.0 These topics explore areas such as fitness and health, document management, decentralized finance, energy management, remote support, cybersecurity, financial services, sales analytics, smart homes, and corporate training. They reflect the latest trends and innovations in IT entrepreneurship, offering opportunities for creative and impactful business ideas.

- 51. AI-Powered Personalized Fitness and Health Tracking Solutions
- 52. Cloud-Based Document Collaboration and Workflow Management
- 53. Blockchain-Based Decentralized Finance (DeFi) Applications
- 54. Intelligent Energy Management and Sustainability Solutions
- 55. Augmented Reality (AR) for Remote Technical Support and Maintenance
- 56. Cybersecurity Solutions for Remote Workforce and Digital Nomads

- 57. Data-driven Predictive Analytics for Sales and Revenue Optimization
- 58. IoT-Enabled Smart Home Security and Surveillance Systems
- 59. Cloud-Based Learning Management System for Corporate Training and Development
- 60. AI-Powered Fraud Detection and Prevention in Financial Services
