ABSTRACT

The application of practice directions assists the implementation of such in the Syariah Courts in preparing work processes starting from case registration until the issuance of consent judgment orders. This study examined the position and application of practice directions in the implementation of **sulh** concerning real estate in the Syariah Courts. The data of this study was based on primary sources such as statutes, practice directions, judgement of cases, **interviews** and secondary sources such as journal articles and books. Descriptive content analysis was used to **analyze** the data collected. This study found that applying practice directions serves as guidelines for such officers and share judges to conduct their duties effectively. Despite this, using content analysis of the case decided, it was found that practice directions in empowering such implementation need to be improved to address current challenges, including legal and administrative issues. The implications of this study can help strengthen aspects of judgement and case management processes in the Malaysian Syariah Courts.

(Times New Roman- Bold Face 11- point, Justify)

Keywords: Sulh, practice directions, Syariah Courts, real estate cases, case management.
(List up not more than five keywords in alphabetical order, separated by commas)

NOTE:
The abstract should contain 150-250 words with no more than five keywords. An Abstract summarises the significant aspects of a paper. It is usually one paragraph long and should succinctly summarise the paper's purpose, methods, significant results, and author's imprecations and conclusions. **Avoid citing references** in the abstract. **Use active rather than passive voice (but without personal pronouns).** Abbreviations should be introduced at the first mention in the text.

Purpose – Reason/aims of the paper. State the background of the study
Methodology – Methodology **how** it was done/scope of the study. State the selection and number of participants. State the design and procedures used, including the intervention or experimental manipulations and the primary outcome measures.
Findings – State the main results of the study. Numerical data may be included but should be kept to a minimum. State the conclusions that can be drawn from the data provided and their implications (if appropriate)- impact on society.
Significance – Who would benefit from this, and what is new about it?

FORMATTING

The page size MUST be set to A4 (210 × 297 millimetres or 8.27 × 11.69 inches) on the Layout—"Page Setup"—Paper tab of your Microsoft Word application. Set the document's margins to 1" for the top, bottom, left, and right margins. The text should be typed in one column and 1.15-spaced. Use Times New Roman font with 11 points for the entire paper. All paragraphs should have a consistent length of words, preferably between 150 and 180.

HEADINGS

The Section Heading, primary Heading, or First-Level heading should be centred, bold-faced, and capitalised using 11-point Times New Roman.

Subsection Heads

Sub-section heads, secondary headings, and second-level headings should be bold-faced and 11-point in upper and lower case, as shown. For subsection heads, a word like "the" or "a" is not capitalised unless it is the first word of the header.

Level	Format
1	CENTERED, BOLD, UPPERCASE The text begins indented as a new paragraph.
2	Flush Left, Bold, Title Case Heading The text begins as a new paragraph.
3	Flush Left, Bold Italic, Title Case Heading The text begins as a new paragraph.
4	Indented, Flush Left, Bold, Title Case Heading Text begins on the same line and continues as a regular paragraph.

5	Indented, Bold Italic, Title Case Heading, Ending with a Period. Text begins on the same line and continues as a regular paragraph.
---	---

Content

The paper should have standard content for a journal, such as **Introduction**, **Literature Review**/Related Work, The Proposed Method or Methodology, Analysis and Results, and the **Conclusion**. In the Introduction, the authors should describe the background of the study and explain the problem that inspired the study. Then, the study's objectives need to be specified in the section. The main content should be in **Times New Roman 11pt font**. The paper should be between **3000 and 5000 words**, excluding References. Enter one spacing for the second paragraph and others.

Example:

INTRODUCTION

Classroom assessment is essential because it enables mathematics teachers to make informed decisions about further lessons, leading to instruction that adequately fits their students' needs and possibilities (Veldhuis, 2015). According to Black et al. (2004), any assessment designed to promote students' learning is considered an assessment for learning. (Black et al., 2004) further clarified that an assessment activity can aid students' learning because it offers information to mathematics teachers that enables them to adjust the teaching and learning activities in which they are involved. Hence, they defined such assessment as formative because the evidence adapts the teaching work to meet learning needs.

Heritage and Potter (2007) indicated that there are three types of formative assessment, namely, on-the-fly assessment, which takes place while teaching; planned-for instruction, which is planned before teaching to support students' learning; and curriculum-embedded assessment, which encompasses two parts: teacher and curriculum developer, which provides feedback on learning order, as well as in-class learning assessment. In other words, assessment is considered one of the essential components of education (Centre for Educational Research and Innovation, 2008). As a result, the Thailand Ministry of Education (2008) urged teachers to assess their students' progress using various methods that are not only relevant to the student's developmental levels but also suitable for that particular subject requirement (Heritage & Potter, 2007).

Example: Write per cent in text:
25 per cent result
(25 %) result

TABLES AND FIGURES

Tables and figures should be placed immediately after the paragraph in which they are mentioned. **All figures should be in high resolution and readable. Authors are encouraged to submit the original format and file of the figures if they are created using other software.** Number tables consecutively and use table numbers when referencing a table (Table 1, Table 2, 3...). Use uppercase and lowercase letters for the title of the tables, as shown here. The table caption must briefly explain the contents of the table.

HaFiz

Mobile Application for Elderly to Memorize Surahs in the Quran

Product Description

HaFiz is a mobile app helping elderly individuals memorize surahs, offering a convenient through mobile technology.

Objective

To facilitate memory retention using repetition techniques.

Uniqueness

Integration of audio, voice and games in memorizing surahs.

Methodology

- Initiation
- Planning
- Development
- Evaluation
- Documentation

Future Works

- Verification of the surah from JAKIM and Ministry of Home Affairs Malaysia.
- Colour uses in the sentence to differentiate tajweed.
- Add voice recording features.

Commercializability

Can be used by NGO and CSR to help elderly in the community.

Impact

- Memorization process be a lot easier.
- Enhance the uses of technology among elderly.

Relevancy

4 out of 5 stars

Evaluations

Interface	Usefulness	Usability	Overall Application

A Green Awareness Educational Recycling Game

PROBLEMS

- Lack of Recycling Awareness
- Previous Initiative not Working
- Unhygienic Places
- Unattractive Game Interfaces

SOLUTIONS

- Game as a Platform
- Fun and Engaging Gameplay
- Easy to Understand and Learn
- Attractive Game Interfaces

BENEFITS

- Learn Recycling Concept
- Promote Recycling Awareness
- Better Environments and Places
- Provide Entertainment

COMMERCIALIZATION

- Waste Management Companies
- Educational Tool in Schools
- Campaigns on Social Media, TV

Card Matching Game Application

Background

Gaming can help boost memory and aid in the treatment of age-related. But, the number of games applications that are suitable for the elderly is less.

This project proposed a card matching game

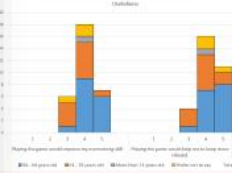

Objective

To develop a game based application for elderly

Methodology

Findings

Future Works

- Adding more levels
- Playing the game offline

Contributes to society

- Increase Mental Agility
- Provide Entertainment
- Reduce Stress
- Play with family

[Neuro]-therapy Game-based Psychotherapy Intervention for Memory Disorder

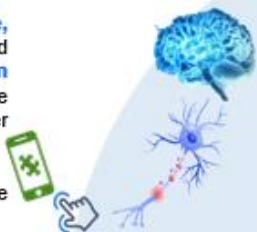

Noraziah ChePa
Nooraini Yusoff
Wan Ahmad Jaafar Wan Yahaya
Rusdi Ishak
Laura Lim Sie-Yi

01 CONCEPT OF INNOVATION

- Integration of **digital game**, **neurofeedback** and **psychotherapy intervention** for elderly, particularly those with memory disorder symptoms.
- Elderly friendly** puzzle game for **exercising memory**

02 ORIGINALITY & NOVELTY

Designed and developed based on
34 predefined criteria

03 APPLICABILITY & IMPACTS

- Improved** memory recall capability, skills & literacy
- 6 registered IPs** (1 patent, 5 copyrights)
- 11 awards** (publication & innovation)
- 10 publications**

04 STATUS OF INNOVATION

- Verified and validated**
- Ready to be in market**

An Intelligent Classifier for Predicting At-Risk students to Mitigate School Dropout

Noraziah ChePa
Ahmad Hanis Mohd Shabli
Azizi Ab Aziz
Wan Hussain Wan Ishak
Laura Lim Sie Yi

01 PRODUCT DESCRIPTION

A **smart mobile classifier** to predict **at-risk students** which based on **14 predictors**

02 OBJECTIVES

To **predict level of risks** of school disengagement among secondary school students

03 GENUINELY, ORIGINALITY & NOVELTY

04 COMMERCIALIZABILITY

- Potential: **private schools, learning institutions**
- Strategy: **licensing, on-shelf sell**

05 RELEVANCY

Sustainable Development Goal 4; Quality
Education

06 APPLICABILITY & IMPACTS

- Early identification** of at-risk students
- Early intervention** mitigate school disengagement
- Reducing risks** of social problems
